#### SPECIFIC COMMENTS TO AUTHORS

The authors have presented a rare case of carcinoma prostate plus carcinoma rectum, where they believe that capox reduced psa level. However there is a flaw in the report. The authors have not motioned what the psa level was after the hormone treatment for carcinoma prostate before the identification of the carcinoma rectum. Without this value, how can the authors come tp the conclusion that psa level; came down after capox? There are a few grammatical corrections which are noted in the proof returned. They may be incorporate.
