SPECIFIC COMMENTS TO AUTHORS

Dear authors! I am very happy getting the chance to review your manuscript. Here is my evaluation: The title reflects the main subjectthesis of the manuscript. The abstract summarize and reflects the work described in the manuscript, the key words reflects the focus of your manuscript and it also adequately describes the background, present status and significance of your study. The manuscript describes methods in an appropriate way. Research objectives are achieved by the experiments used in this study. Contribution of your study is very important for patient care and cure to prevent further complications during mechanical ventilation. The manuscript interprets the findings adequately and appropriately, highlighting the key points concisely, clearly and logically. Findings and their applicability/relevance to the literature are stated in a clear and definite manner. Discussion is accurate and discusses the paper’s scientific significance and relevance to clinical practice sufficiently. Tables are sufficient, in good quality and appropriately illustrative of the paper contents. The manuscript meets the requirements of statistical analysis. The manuscript cites appropriately the latest, important and authoritative references in the introduction and discussion sections. It is

SPECIFIC COMMENTS TO AUTHORS

Greetings I read the manuscript with interest. Although the topic is well known, it still have clinical value. Overall the study is well conducted, written and described. The limitations of the study is also well mentioned. In my opinion the study do not have a major flaws or limitation, no ethical concerns and has scientific credibility. However, a few minor aspect need attention 1. You mention adult (>14 years). the age >14 years are not regarded as adults. Please rewrite. 2. You mention average ICU days before getting VAP and then presented the data as mean +/- SD. please correct. 3. The study type-prospective case control is better termed as cross-sectional study. 4. What types of culture were done- aerobic / anaerobic or both? 5. was fungal staining or cultures were also done? Best of luck
