#### **SPECIFIC COMMENTS TO AUTHORS**

This review summarized the epidemiology, genetics, pathogenesis, diagnosis and treatment of alcohol-related hepatitis. Some issues need to be addressed before publication. 1. The background in Introduction section needs to be detailed. 2. Some abbreviations should be described in the full names when they first appeared, such as AASLD. 3. The format of tables needs to be adjusted to three-line tables. 4. The authors claimed that the prevalence of ARH has been on a rise even prior to COVID-19 pandemic. But there is not much information about the association between COVID-19 and ARH. It is strongly suggested that authors should discuss more about it.

## SPECIFIC COMMENTS TO AUTHORS

The authors comprehensively review the clinical and basical research about Alcohol-Related Hepatitis (ARH). The manuscript is well organized. The manuscript would provide insights into the latest progress on ARH.

#### **SPECIFIC COMMENTS TO AUTHORS**

The authors have revised the manuscript accordingly and they have comprehensively reviewed ARH. One minor problem still needs to be addressed. 1. The titles of tables should be above the tables.
