

Dear Reviewer 1,

We have repolished the article to make readers understand our case smoothly. And the FOBT was tested in outpatient care, we have declared it in the article. Thank you for your precious suggestions.

Sincerely,

Suxian Liu

Dear Reviewer 2,

We have repolished the article to make readers understand our case smoothly. And we added the result of pathological examination during follow-up endoscopy in the article. Also, we (endoscopists) were invited to ICU, so we performed endoscopic hemostasis first. The attending doctor responded CTA can be performed in case of haemostasis failure by endoscopists.

Best Regards,

Suxian Liu
