PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Cases*

Manuscript NO: 82936

Title: Utility of Single-Balloon Enteroscopy Overtubes in Massive Upper Gastrointestinal Bleeding

Provenance and peer review: Unsolicited manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 05077783

Position: Editorial Board

Academic degree: MD, MSc

Professional title: Assistant Professor, Surgeon

Reviewer's Country/Territory: Brazil

Author's Country/Territory: China

Manuscript submission date: 2023-01-05

Reviewer chosen by: AI Technique

Reviewer accepted review: 2023-01-06 03:56

Reviewer performed review: 2023-01-08 02:07

Review time: 1 Day and 22 Hours

SPECIFIC COMMENTS TO AUTHORS

The authors report a case of removal of massive intragastric clotting using an enteroscopy overtube. The report is of relative scientific interest, as it describes a novel technical variation for the treatment of a relatively common condition. While the use of an enteroscopy overtube was not previously described, other types of overtube are used for the removal of massive intragastric clots. Writing in the english language needs significant reviewing, in sentences such as this: on page 1 line 6 "The bleeding site"; page 1 line 29 "This appears"; page 2 line 37 "is a commonly"; page 2 line 39 "clear vision of the gastrointestinal tract"; page 3 line 91 " after successfully removing". Why was a fecal occult blood test performed on this patient?

SPECIFIC COMMENTS TO AUTHORS

Dear Authors, thank you very much for your well-written manuscript. Please pay attention to the following questions and queries: 1. Line 30: please correct us such: or failed to remove. 2. Line 73: did you substitute fibrinogen and other coagulation factors during the emergency management of the gastrointestinal bleeding? 3. Line 92: please mention how many clips did you use to stop the bleeding. 4. Line 96: where was the ulcer located? 5. Line 96: please correct us such: due to a gastric ulcer. 6. Line 104: did you take any biopsies during the follow-up endoscopy? 7. Discussion: please discuss why you have not decided to perform a CT-angiography in order to locate the bleeding and take hemostatic measures. Best Regards
