COMMENTS FROM PEER REVIEWERS

How is it possible, that your Ethical Committee agree with invasive investigation of healthy volunteers?

The Ethical Committee have very standards for information to individuals entering a research project - we had to comply with all the regulations in this area.
The department performing this investigation has a large experience with invasive investigations without experiencing any complications or side effects.

How did you enlist them?

A notice regarding the research project was posted on a bulletin board at the hospital and in the local newspaper.

Yours sincerely

Helle Zacho, MD, PhD-student
