PEER-REVIEW REPORT

Name of journal: *World Journal of Clinical Cases*

Manuscript NO: 83350

Title: Interaction between the left ventricular ejection fraction and left ventricular strain and its relationship with coronary stenosis

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 06129117
Position: Peer Reviewer
Academic degree: PhD

Professional title: Doctor

Reviewer's Country/Territory: Japan

Author's Country/Territory: China

Manuscript submission date: 2023-01-20

Reviewer chosen by: AI Technique

Reviewer accepted review: 2023-01-26 08:31

Reviewer performed review: 2023-02-08 10:43

Review time: 13 Days and 2 Hours

SPECIFIC COMMENTS TO AUTHORS

In this study, the authors analyzed the relationship between the left ventricular ejection fraction measured using magnetic resonance imaging, left ventricular strain, and coronary stenosis. The study is designed well, and the results are very interesting. Minor comments: 1. There are some minor language polishing should be revised. 2. The table 5 should be deleted, and the data in is can be insert to the main text. 3. The references list can be updated.

SPECIFIC COMMENTS TO AUTHORS

This is an interesting study of interaction between the left ventricular ejection fraction and left ventricular strain and its relationship with coronary stenosis. Overall, this manuscript is very well written. Only some minor editing is required before final acceptance.
