Report, the full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Clinical Cases, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors. The title of the manuscript is too long and must be shortened to meet the requirement of the journal (Title: The title should be no more than 18 words). Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor. In order to respect and protect the author's intellectual property rights and prevent others from misappropriating figures without the author's authorization or abusing figures without indicating the source, we will indicate the author's copyright for figures originally generated by the author, and if the author has used a figure published elsewhere or that is copyrighted, the author needs to be authorized by the previous publisher or the copyright holder and/or indicate the reference source and copyrights. Please check and confirm whether the figures are original (i.e. generated de novo by the author(s) for this paper). If the picture is 'original', the author needs to add the following copyright information to the bottom right-hand side of the picture in PowerPoint (PPT): Copyright ©The Author(s) 2023. Authors are required to provide standard three-line tables, that is,

**Telephone:** +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	only the top line, bottom line, and column line are displayed, while	
	other table lines are hidden. The contents of each cell in the table	
	should conform to the editing specifications, and the lines of each	
	row or column of the table should be aligned. Do not use carriage	
	returns or spaces to replace lines or vertical lines and do not	
	segment cell content. Before final acceptance, when revising the	
	manuscript, the author must supplement and improve the	
	highlights of the latest cutting-edge research results, thereby further	
	improving the content of the manuscript. To this end, authors are	
	advised to apply a new tool, the RCA. RCA is an artificial	
	intelligence technology-based open multidisciplinary citation	
	analysis database. In it, upon obtaining search results from the	
	keywords entered by the author, "Impact Index Per Article" under	
	"Ranked by" should be selected to find the latest highlight articles,	
	which can then be used to further improve an article under	
	preparation/peer-review/revision. Please visit our RCA database	
	for more information at:	
	https://www.referencecitationanalysis.com/.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	
	not too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided.	[Y]
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]

	The 'INTRODUCTION' section clearly describes the relevant background information for the study. Only the most relevant and			
	current (within the past 5 years) literature is cited, with the			
	exception of rare instances of seminal literature citations. All			
	technical terms and/or abbreviations are explained and/or defined,			
	with the full name of abbreviations given upon first appearance in			
15	the text and the abbreviation presented in parentheses [i.e.,	[Y]		
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',			
	'we') are used appropriately to clearly indicate the work performed			
	by the author(s). When weaknesses of previous studies are			
	described in the text to highlight the innovations related to the			
	current study, the information is presented carefully.			
	The 'MATERIALS AND METHODS' section clearly and accurately			
16	describes all materials and methods used to obtain the data	F 3/ 1		
16	presented in the article and is adequate for a reader to repeat the	[Y]		
	study.			
	The 'RESULTS' section concisely describes the observational and			
	experimental results. Representative data and data that have			
	scientific significance are emphasized. Data is presented in either			
17	the text, a table or figure (i.e., chart, diagram, graph or image), but is	[Y]		
	not repeated among each. Information presented in the tables and			
	figures clearly describes the trends, meaning, and inferences.			
	Results described in textual form are accurate, concise and clear.			
	Statistical symbols are accurate. Statistical significance is expressed			
	as ${}^{a}P$ < 0.05, ${}^{b}P$ < 0.01 ( $P$ > 0.05 usually does not need to be denoted).			
18	If there are other series of $P$ values, $^cP$ < 0.05 and $^dP$ < 0.01 are used,	[Y]		
	and a third series of $P$ values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01.			
	Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.

	The 'DISCUSSION' section (1) describes the main purpose and		
	hypothesis of the study; (2) summarizes the most important results;		
19	(3) illustrates and explains the results (but does not simply repeat		
	the data) and draws conclusions or inferences based on the results;	[ V ]	
	(4) points out the limitations of the study and their impact on the	[Y]	
	results, as well as proposes further advice on future research		
	topic(s) or direction(s); and (5) describes the theoretical significance		
	and practical value of the findings.		
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any		
	individuals or organizations for technical support (i.e., providing		
20	instrumentation, equipment or experimental materials, and/or	far1	
20	assistance in experimental work), non-technical services (i.e., useful	[N]	
	inspiration, suggestions, guidance, or review), and/or any other	1	
	auxiliary work.		
01	The 'ARTICLE HIGHLIGHTS' section provides comments for	F 3/ 1	
21	original articles in accordance with the specified format.	[Y]	
	The 'REFERENCES' section lists the references in the Vancouver		
	style. This style uses Arabic numeral in-text citations based on the		
	order of the first appearance of a source in the text. For citations		
	where the author's name is indicated in the text, a superscript		
	number should be placed following the name (i.e, "Pang et al"). For		
	citations where no author is indicated, a superscript number should		
22	be placed at the end of the sentence. Respective examples are: "Ma[1]	[Y]	
	reported", "Pan et al <sup>[2-5]</sup> indicated"; "PCR has a high		
	sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the		
	reference number is described in the text; for example, "The		
	experimental method used has been described in reference [8]." The		
	style of reference citations in tables is the same as that in the text		
	(e.g., Pan et al <sup>[2-5]</sup> , please see reference [8]).

23	Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version.	[Y]
