	First decision: 2023-03-21 18:15	
	Editorial Office's Comments	
	Science Editor: Remind Revision at 2023-03-29 08:18	
	Company Editor-in-Chief: 请您在伦理委员会批准文件补上签证或	
	将会直接拒绝接受。 I have reviewed the Peer-Review Report, the	
	full text of the manuscript, and the relevant ethics documents, all of	
	which have met the basic publishing requirements of the World	
	Journal of Gastroenterology, and the manuscript is conditionally	
	accepted. I have sent the manuscript to the author(s) for its revision	
	according to the Peer-Review Report, Editorial Office's comments	
	and the Criteria for Manuscript Revision by Authors. Before final	
	acceptance, uniform presentation should be used for figures	
2	showing the same or similar contents; for example, "Figure	[V]
2	1Pathological changes of atrophic gastritis after treatment. A:;	[Y]
	B:; C:; D:; E:; F:; G:". Please provide decomposable	
	Figures (in which all components are movable and editable),	
	organize them into a single PowerPoint file. Please authors are	
	required to provide standard three-line tables, that is, only the top	
	line, bottom line, and column line are displayed, while other table	
	lines are hidden. The contents of each cell in the table should	
	conform to the editing specifications, and the lines of each row or	
	column of the table should be aligned. Do not use carriage returns	
	or spaces to replace lines or vertical lines and do not segment cell	
	content. Please check and confirm whether the figures are original	
	(i.e. generated de novo by the author(s) for this paper). If the picture	

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

https://www.wjgnet.com

is 'original' the author	needs to add the following copyright	
information to the both	om right-hand side of the picture in	
PowerPoint (PPT): Copyr	ight ©The Author(s) 2022. Before final	
acceptance, when revisi	ng the manuscript, the author must	
supplement and improve	the highlights of the latest cutting-edge	
research results, thereby	further improving the content of the	
manuscript. To this end,	authors are advised to apply a new tool,	
the Reference Citation	Analysis (RCA). RCA is an artificial	
intelligence technology-l	pased open multidisciplinary citation	
analysis database. In it,	upon obtaining search results from the	
keywords entered by the	author, "Impact Index Per Article" under	
"Ranked by" should be se	lected to find the latest highlight articles,	
which can then be used	d to further improve an article under	
preparation/peer-review/	revision. Please visit our RCA database	
for more	information at:	
https://www.referencecit	ationanalysis.com/.	
The fixed headings are cop	pied.	[Y]
The title concisely summa	arizes the main topic of the study and is	
not too long (no more tha	n 18 words). Words such as 'exploration',	
4 'research', 'analysis', 'obse	ervation', and 'investigation' are avoided.	[Y]
The title does not start wi	th 'The' and does not include any Arabic	
numbers or uncommon ab	breviations.	
5 A short running title is pro	ovided (no more than 6 words).	[Y]
The authors' full family	(sur)names and full/abbreviated first	
6 names are listed on the	title page and are consistent with those	[Y]
listed in the signed BPG C		

7	The 'Author contributions' passage describes the specific contribution(s) made by each author. The author's names are listed in the following format: full family (sur)name followed by abbreviated first and middles names. e.g., "Wang CL and Liang L contributed equally to this work; Wang CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the research study; Wang CL, Zou CC, Hong F and Wu XM performed the research; Xue JZ and Lu JR contributed new reagents and analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and Wang CL, Liang L and Fu JF wrote the manuscript. All authors have read and approve the final manuscript."	[Y]
8	The 'Supported by' statement describes the source(s) of financial support and includes the corresponding identification number(s) and program ID(s) if available, and contains no spelling errors.	[Y]
9	The 'Corresponding author' passage provides the corresponding author's full first and family (sur)names, abbreviated title (e.g., MD, PhD), affiliated institute's name and complete postal address (including zip code) and e-mail (written in all lowercase), and contains no spelling errors.	[Y]
10	The Manuscript Tracking information (<i>i.e.</i> , Received, Peer review started, First decision, Revised, Accepted, Article in press, and Published online) are provided along with the corresponding editor and date for each item, and contain no spelling errors.	[Y]
11	The Abstract section is formatted according to the article-specific style (structured vs unstructured) and word count thresholds, as follows: Commentary, Frontier, Diagnostic Advances, Medical Ethics, Minireview, Review, Therapeutics Advances, and Topic Highlight: Non-structured abstract that is no less than 200 words. Field of Vision, Case Report and Letter to the Editor:	[Y]

	Non-structured abstract that is no less than 150 words.	
	Research articles: Structured abstract with subsections for AIM (no	
	more than 20 words); METHODS (no less than 80 words); RESULTS	
	(no less than 120 words); and CONCLUSION (no more than 26	
	words).	
	The 'Key words' list provides 5-10 keywords that reflect the main	
12	content of the study. The first letter of each keyword is capitalized,	[Y]
	and each keyword is separated by a semicolon.	
	The "citation" contains authors' names and manuscript title. The	
	name of the first author should be typed in bold letters; the family	
	(sur) name of all authors should be typed with the first letter	
	capitalized, followed by their abbreviated first and middle initials.	
13	For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick	[Y]
	Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,	
	Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes	
	mellitus increases the risk of gastric cancer: A meta-analysis. World J	
	Gastroenterol 2019; In press	
	The 'Core tip' provides a summary (less than 100 words) of the	
4.4	study that outlines the most innovative and important arguments	
14	and core contents of the paper and will serve to effectively attract	[Y]
	readers.	
	The 'INTRODUCTION' section clearly describes the relevant	
	background information for the study. Only the most relevant and	
	current (within the past 5 years) literature is cited, with the	
	exception of rare instances of seminal literature citations. All	
15	technical terms and/or abbreviations are explained and/or defined,	[Y]
	with the full name of abbreviations given upon first appearance in	
	the text and the abbreviation presented in parentheses [i.e.,	
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed	
	ı	

	by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the	
	current study, the information is presented carefully.	
	The 'MATERIALS AND METHODS' section clearly and accurately	
16	describes all materials and methods used to obtain the data	[Y]
	presented in the article and is adequate for a reader to repeat the	
	study.	
	The 'RESULTS' section concisely describes the observational and	
	experimental results. Representative data and data that have	
	scientific significance are emphasized. Data is presented in either	
17	the text, a table or figure (i.e., chart, diagram, graph or image), but is	[Y]
	not repeated among each. Information presented in the tables and	
	figures clearly describes the trends, meaning, and inferences.	
	Results described in textual form are accurate, concise and clear.	
	Statistical symbols are accurate. Statistical significance is expressed	
	as ${}^{\mathrm{a}}P < 0.05$, ${}^{\mathrm{b}}P < 0.01$ ($P > 0.05$ usually does not need to be denoted).	
18	If there are other series of P values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,	[Y]
	and a third series of P values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01.	
	Statistical data is expressed as mean ± SD or mean ± SE.	

	The 'DISCUSSION' section (1) describes the main purpose and	
	hypothesis of the study; (2) summarizes the most important results;	Da.
	(3) illustrates and explains the results (but does not simply repeat	
19	the data) and draws conclusions or inferences based on the results;	
19	(4) points out the limitations of the study and their impact on the	[Y]
	results, as well as proposes further advice on future research	
	topic(s) or direction(s); and (5) describes the theoretical significance	
	and practical value of the findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	
	individuals or organizations for technical support (i.e., providing	
20	instrumentation, equipment or experimental materials, and/or	D. II
20	assistance in experimental work), non-technical services (i.e., useful	[N]
	inspiration, suggestions, guidance, or review), and/or any other	
	auxiliary work.	
21	The 'ARTICLE HIGHLIGHTS' section provides comments for	D./I
21	original articles in accordance with the specified format.	[Y]
	The 'REFERENCES' section lists the references in the Vancouver	
	style. This style uses Arabic numeral in-text citations based on the	
	order of the first appearance of a source in the text. For citations	
	where the author's name is indicated in the text, a superscript	
	number should be placed following the name (i.e, "Pang et al"). For	[Y]
	citations where no author is indicated, a superscript number should	
22	be placed at the end of the sentence. Respective examples are: "Ma ^[1]	
	reported", "Pan et al ^[2-5] indicated"; "PCR has a high	
	sensitivity ^[6,9] ." No superscript numbers are used when the	
	reference number is described in the text; for example, "The	
	experimental method used has been described in reference [8]." The	
	style of reference citations in tables is the same as that in the text	
	(e.g., Pan et al ^[2-5] , please see reference [8]).	

Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version. The number of cited references is appropriate for the article type, as follows: Commentary: no less than 50; Review: no less than 100; Article: no less than 30/26; Case Report and Letter to the Editor; no less than 1. The ethics-related statements are provided in accordance with the manuscript type (e.g., Manuscript NoInstitutional review board statement, Manuscript NoAnimal care and use statement, etc.). The names of the peer reviewers and the scientific editor are present at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL). The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, x, +, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs that depicts data of the same theme. For example: Figure 1 Pathological changes in atrophic gastritis tissue before and after treatment. A:; B:; C:; D:; E:; F:
