SPECIFIC COMMENTS TO AUTHORS

The present study retrospectively included 44 uncomplicated SCHF, 16 received treatment before implementation of the 6 AM Start quality improvement program while 28 treated after, and 6 FSF (5 treated before program and 1 treated after) to compare demographics and timing of treatment of SCHF and FSF treated one year before and after implementation as well as the survey responses from the surgical team, in the result, it demonstrated significantly reduced wait times for surgery for uncomplicated SCHF presenting overnight while discussing the importance of shared decision-making with the stakeholders. In term of this, the manuscript is acceptable, However, several minor revisions are needed. 1. The figure 1 and figure are deformed, needing to be 2. The words in figure 3 are not clear, and the figure 3 is not fully explained revised. 3. The data is only from one center, so the number of subjects are in the result. limited which affect the significance of the study, and it is better to perform multiple centers research.

SPECIFIC COMMENTS TO AUTHORS

It is nicely written. However, it does not add anything to the literature or change the management plan.

SPECIFIC COMMENTS TO AUTHORS

The study is aimed to describe the effect of a program allowing an early operating room (OR) start for uncomplicated trauma prior to an elective day of surgery to decrease wait times for surgery for urgent fractures admitted overnight. The title is "Effectiveness of an Early Operating Room Start Time in Managing Pediatric Trauma". 1. This is a retrospective design. 2. The sample size of the study is relatively small. 3. Several factors influence the outcome of the study. Please discuss these. 4. Please review the literature and add more details in the discussion section. 5. Please add more details of the limitations of the study. 6. What is the new knowledge of the study? 7. Please recommend to the readers "How to apply this knowledge in clinical practice?".
