**SPECIFIC COMMENTS TO AUTHORS**

1 Title. Does the title reflect the main subject/hypothesis of the manuscript? YES 2 Abstract. Does the abstract summarize and reflect the work described in the manuscript? YES 3 Key Words. Do the key words reflect the focus of the manuscript? YES 4 Background. Does the manuscript adequately describe the background, present status and significance of the study? YES 5 Methods. Does the manuscript describe methods (e.g., experiments, data analysis, surveys, and clinical trials, etc.) in adequate detail? YES. Histological examination is always necessary to perform diagnosis? Clinical presentation can be sufficient? Which are the differential diagnoses? Why did you exclude lichen aureus? I know that histological examination is often superimposable in pigmented purpuric dermatoses and diagnoses can be achieved also by clinical presentation. 6 Results. Are the research objectives achieved by the experiments used in this study? What are the contributions that the study has made for research progress in this field? 7 Discussion. Does the manuscript interpret the findings adequately and appropriately, highlighting the key points concisely, clearly and logically? Are the findings and their applicability/relevance to the literature stated in a clear and definite

manner? Is the discussion accurate and does it discuss the paper's scientific significance and/or relevance to clinical practice sufficiently? Which is the rationale of treating with dipyridamole tablets ? Mometasone cream can be sufficient? Which is the prevalence of Majocchi disease in pediatric age? "Although Majocchi disease is harmless, cutaneous T-cell lymphoma needs to be ruled out in some cases" please explain this sentence with some examples of references; otherwise you should delete it. 8 Illustrations and tables. Are the figures, diagrams, and tables sufficient, good quality and appropriately illustrative, with labeling of figures using arrows, asterisks, etc, and are the legends adequate and accurately reflective of the images/illustrations shown? The pictures are of good quality 9 Biostatistics. Does the manuscript meet the requirements of biostatistics? NO 10 Units. Does the manuscript meet the requirements of use of SI units? NO 11 References. Does the manuscript appropriately cite the latest, important and authoritative references in the Introduction and Discussion sections? Does the author self-cite, omit, incorrectly cite and/or over-cite references? You should add the recent review about pigmented purpuric dermatoses published in J Clin Med: Spigariolo CB, et al. Pigmented Purpuric Dermatoses: A Complete Narrative Review. J Clin Med. 2021 May 25;10(11):2283. 12 Quality of manuscript organization and presentation. Is the manuscript well, concisely and coherently organized and presented? Is the style, language and grammar accurate and appropriate? OK 13 Research methods and reporting. Authors should have prepared their manuscripts according to BPG's standards for manuscript type and the appropriate topically-relevant category, as follows: (1) CARE Checklist (2013) - Case report; (2) CONSORT 2010 Statement - Clinical Trials study, Prospective study, Randomized Controlled trial, Randomized Clinical trial; (3) PRISMA 2009 Checklist - Evidence-Based Medicine, Systematic review, Meta-Analysis; (4) STROBE Statement - Case Control study, Observational study, Retrospective Cohort study; and (5) The ARRIVE Guidelines - Basic study. For (6) Letters

to the Editor, the author(s) should have prepared the manuscript according to the appropriate research methods and reporting. Letters to the Editor will be critically evaluated and only letters with new important original or complementary information should be considered for publication. A Letter to the Editor that only recapitulates information published in the article(s) and states that more studies are needed is not acceptable? N/A 14 Ethics statements. For all manuscripts involving human studies and/or animal experiments, author(s) must submit the related formal ethics documents that were reviewed and approved by their local ethical review committee. Did the manuscript meet the requirements of ethics? N/A

**SPECIFIC COMMENTS TO AUTHORS**

Comments about the manuscript: “Purpura annularis telangiectodes of Majocchi: a case report” Majocchi's purpura annularis telangiectodes is a rare form of pigmented purpuric dermatosis (PPD), characterized by reddish-brown macules in the form of symmetrical rings on the lower limbs. The etiology of this more common condition in children and young women is unknown. Diagnosis depends on clinical and histopathological examinations. The manuscript reports the case of a 9-year-old girl who presented with a repeated reddish-brown ring-shaped rash on both lower limbs. the case presented here brings a new element to the knowledge of this affection. The manuscript is clear, well written. I think it could be released after some minor improvements. Page 3. “ Kunming Children’s Hospital”: specify city and country. Page 5. “ Antinuclear antibody”: write “antinuclear antibody” (without capital letters). Page 5, Final diagnostic. “Purpura annularis telangiectodes of Majocchi (PATM).”: write “PATM” (use the abbreviation that has been defined above). Page 6. “telephoneIn.”: delete “In”. Figure 2: add a scale bar on the picture. Figure 3 : - add a scale bar on the picture (intead of x400), - - add several legends and/or arrows to show the different parts (lymphocytes,
