Scientific significance of the conclusion in this manuscript	<input type="checkbox"/> Grade A: Excellent <input type="checkbox"/> Grade B: Good <input checked="" type="checkbox"/> Grade C: Fair <input type="checkbox"/> Grade D: No scientific significance
Language quality	<input type="checkbox"/> Grade A: Priority publishing <input checked="" type="checkbox"/> Grade B: Minor language polishing <input type="checkbox"/> Grade C: A great deal of language polishing <input type="checkbox"/> Grade D: Rejection
Conclusion	<input type="checkbox"/> Accept (High priority) <input type="checkbox"/> Accept (General priority) <input checked="" type="checkbox"/> Minor revision <input type="checkbox"/> Major revision <input type="checkbox"/> Rejection
Re-review	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No
Peer-reviewer statements	Peer-Review: <input checked="" type="checkbox"/> Anonymous <input type="checkbox"/> Onymous
	Conflicts-of-Interest: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

SPECIFIC COMMENTS TO AUTHORS

Excellent case report, need a few modifications to make it a more promising article. Here are a few suggestions: The conclusion can be modified; the current conclusion is not doing justice to the rare finding report, especially in the abstract part. Submitted radiology images are of substandard quality; better images shall be added. Bladder biopsy and IHC photomicrographs shall be added

SPECIFIC COMMENTS TO AUTHORS

Rare site of metastatic disease from lung to the bladder. Please review and make language and grammatical changes - few examples as below squamous cell carcinoma antigen, 0.99 ng/mL - is it relevant in adenocarcinoma? In history of past illness - was found to have a pulmonary nodule due to the pain in left leg in the hospital in April 2019 - Were you planning to say - Patient with history of pulmonary nodule presented with pain in her left thigh in April 2019
