## Manuscript Title:

The timing of surgical operation for patients with intra-abdominal infection: a systematic review and meta-analysis

## Date of Revision:

July 17, 2023

### Abstract:

#### AIM

This study aimed to assess the efficacy of early versus delayed surgical exploration in the treatment of intra-abdominal infection in terms of overall mortality.

#### METHODS

A systematic literature search was performed using PubMed, Embase, Cochrane Central Register of Controlled Trials, via Ovid, and ScienceDirect. The systematic review was conducted using the Preferred Reporting Items for Systematic Reviews and Meta-analyses method. Based on the timing of the surgical operation, we divided the literature into two groups: early surgery and delayed surgery. For the early and delayed surgery groups, the intervention was performed within and after 12 h of the initial surgical intervention, respectively. The main outcome measure was the mortality rate. The literature search was performed from May 5 to 20, 2021. We also searched the World Health Organization International ...

This document certifies that the manuscript listed above was copy edited for English language by LetPub, with regard to grammar, punctuation, spelling, and clarity. All of our language editors are native English speakers with long-term experience in editing scientific and technical manuscripts. We are committed to leveling the playing field for researchers whose native language is not English.

- Documents receiving this certification should be regarded as having undergone professional editorial revision for English language before submission. However, the authors may accept or reject LetPub's suggestions and changes at their own discretion and LetPub does not have editorial control over the submitted documents.
