SPECIFIC COMMENTS TO AUTHORS

This is a well-documented case of TH in a 2-year child affected by SARS-CoV-2 infection. The case overall adds little to literature, but I think that it can have a good educational value. Some comments: - please distinguish between SARS-CoV-2 infection and COVID-19 all throughout the text (e.g., abstract: COVID-19 infection, should be SARS-CoV-2 infection - and there are several other cases in the paper). - do the Authors have information on the specific variant of SARS-CoV-2 infecting the child? - when was the case recorded and documented? - if possible, please expand on the novelty of the case.

SPECIFIC COMMENTS TO AUTHORS

1 Title. I suggest "Transient hyperphosphatasemia in a toddler with COVID-19 infection" 2 Abstract. Appropriate 3 Key Words Appropriate 4 Background. Shorter general information about COVID infection, more detail about laboratory abnormalities related with COVID-19 infection and its complications. 5 Methods. Appropriate 6 Results. Appropriate 7 Discussion. The infections known to be related with Transient hyperphosphatasemia should be given in a table. 8 Illustrations and tables. Appropriate 9 Biostatistics. N/A 10 Units. Appropriate 11 References. Appropriate 12 Quality of manuscript organization and presentation. average 13 Research methods and reporting. Appropriate 14 Ethics statements. A statement about informed consent can be added into the beginning of case presentation section.
