

Dear Editors

Review 1:

It is innovative to choose the topic of breast cancer metastasizing to the upper gastrointestinal tract. The hierarchical of article is reasonable. Literature review and analysis are appropriate.

*We thank you for your time and interest.*

Review 2:

This manuscript submitted to World Journal of Gastroenterology is a review of the literature. This study undertook a comprehensive review of the available literature on breast cancer metastases to the esophagus and stomach including the clinical symptoms and presentation, endoscopic features, additional diagnostic imaging modalities, treatment and outcomes. This article refers to a large number of literature and has some clinical implications, the content is comprehensive and well-conditioned. But there are some common small mistakes and irregular writing format in the text. Please refer to the "Submission Guidelines" for modification.

*The manuscript has been edited to conform to the journal's requirements.*

We thank you for your time and interest.

Regards
