SPECIFIC COMMENTS TO AUTHORS

1. What is the reason of different technique of THR between both hips? Please clarify 2. What is disadvantages of robotic technique? How about the cost and learning curve? 3. One-on-one case is insufficient for making a conclusion of technique comparison. 4. Robotic surgery is known to have more accuracy, and adding a bilateral surgery would not provide a didactic value sufficiently. Please find more interesting aspects from this cases to be presented.
