**SPECIFIC COMMENTS TO AUTHORS**

1. There is repetition/ duplication of text in paragraphs and tables. That can be minimized. 2. Can the images of dental trauma due to endoscopy be included? 3. Do the cases having ‘trismus’ have more dental trauma? 4. Does the frequency of dental trauma differ with the type of endoscopy procedure – like EGD, ERCP, EUS? 5. Does the intubation prior to upper endoscopy is risk factor for dental trauma?

### SPECIFIC COMMENTS TO AUTHORS

In this manuscript, the authors presented that dental injury during endoscopy is an underreported complication with potential for significant litigious consequences. It's an interesting manuscript and provides some new ideas to the readers. There's only one issue which should be addressed. 1. In the author's study, was there any judicial proceedings due to dental injury during endoscopy? Please add this content and discuss it. So, minor revision should be recommended for this manuscript.

**SPECIFIC COMMENTS TO AUTHORS**

Thank you for submitting this well written paper, however it does not add anything to literature and the dental complications are already known. Thanks
