	General Information of the Manuscript	
	Name of journal: World Journal of Transplantation	
	Manuscript NO.: 84626	
	Column: Review	
	Title: Islet transplantation - immunological challenges and current	
1	perspectives	[Y]
	Authors: Plamena Kabakchieva, Yavor Assyov, Stavros Gerasoudis,	
	Georgi Vasilev, Monika Peshevska-Sekulovska, Metodija	
	Sekulovski, Snezhina Lazova, Dimitrina Georgieva Miteva, Milena	
	Gulinac, Latchezar Tomov and Tsvetelina Velikova	
	Reviewer code: 02446223, and 03475330	

7041 Koll Center Parkway, Suite 160, Pleasanton, CA 94566, USA **Telephone:** +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

	First decision: 2023-04-11 06:45	
	Editorial Office's Comments	
	Science Editor: The manuscript has been peer-reviewed, and it's	
	ready for the first decision.	
	Company Editor-in-Chief: I recommend the manuscript to be	
	published in the World Journal of Transplantation. Before final	
	acceptance, when revising the manuscript, the author must	
	supplement and improve the highlights of the latest cutting-edge	
	research results, thereby further improving the content of the	
2	manuscript. To this end, authors are advised to apply a new tool,	[Y]
	the RCA. RCA is an artificial intelligence technology-based open	
	multidisciplinary citation analysis database. In it, upon obtaining	
	search results from the keywords entered by the author, "Impact	
	Index Per Article" under "Ranked by" should be selected to find the	
	latest highlight articles, which can then be used to further improve	
	an article under preparation/peer-review/revision. Please visit our	
	RCA database for more information at:	
	https://www.referencecitationanalysis.com/.	
3	The fixed headings are copied.	[Y]
	The title concisely summarizes the main topic of the study and is	
	not too long (no more than 18 words). Words such as 'exploration',	
4	'research', 'analysis', 'observation', and 'investigation' are avoided.	[Y]
	The title does not start with 'The' and does not include any Arabic	
	numbers or uncommon abbreviations.	
5	A short running title is provided (no more than 6 words).	[Y]

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

6	The authors' full family (sur)names and full/abbreviated first	
	names are listed on the title page and are consistent with those	[Y]
	listed in the signed BPG Copyright License Agreement form.	
	The 'Author contributions' passage describes the specific	
	contribution(s) made by each author. The author's names are listed	
	in the following format: full family (sur)name followed by	
	abbreviated first and middles names.	
	e.g., "Wang CL and Liang L contributed equally to this work; Wang	
7	CL, Liang L, Fu JF, Zou CC, Hong F and Wu XM designed the	[Y]
	research study; Wang CL, Zou CC, Hong F and Wu XM performed	
	the research; Xue JZ and Lu JR contributed new reagents and	
	analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and	
	Wang CL, Liang L and Fu JF wrote the manuscript. All authors	
	have read and approve the final manuscript."	
	The 'Supported by' statement describes the source(s) of financial	
8	support and includes the corresponding identification number(s)	[Y]
	and program ID(s) if available, and contains no spelling errors.	
	The 'Corresponding author' passage provides the corresponding	
	author's full first and family (sur)names, abbreviated title (e.g., MD,	
9	PhD), affiliated institute's name and complete postal address	[Y]
	(including zip code) and e-mail (written in all lowercase), and	
	contains no spelling errors.	
	The Manuscript Tracking information (i.e., Received, Peer review	
10	started, First decision, Revised, Accepted, Article in press, and	[]/]
	Published online) are provided along with the corresponding editor	[Y]
	and date for each item, and contain no spelling errors.	
	The Abstract section is formatted according to the article-specific	
11	style (structured vs unstructured) and word count thresholds, as	[]/]
	follows:	[Y]
	Commentary, Frontier, Diagnostic Advances, Medical Ethics,	
<u> </u>		

Telephone: +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

Minireview, Review, Therapeutics Advances, and Topic Highlight:	
Non-structured abstract that is no less than 200 words.	
Field of Vision, Case Report and Letter to the Editor:	
Non-structured abstract that is no less than 150 words.	
Research articles: Structured abstract with subsections for AIM (no	
more than 20 words); METHODS (no less than 80 words); RESULTS	
(no less than 120 words); and CONCLUSION (no more than 26	
words).	
The 'Key words' list provides 5-10 keywords that reflect the main	
content of the study. The first letter of each keyword is capitalized,	[Y]
and each keyword is separated by a semicolon.	
The "citation" contains authors' names and manuscript title. The	
name of the first author should be typed in bold letters; the family	
(sur) name of all authors should be typed with the first letter	
capitalized, followed by their abbreviated first and middle initials.	
For example, an article by Jae Moon Yoon, Ki Young Son, Chun Sick	[Y]
Eom, Daniel Durrance, Sang Min Park will be written as Yoon JM,	
Son KY, Eom CS, Durrance D, Park SM. Pre-existing diabetes	
mellitus increases the risk of gastric cancer: A meta-analysis. World J	
Gastroenterol 2019; In press	
The 'Core tip' provides a summary (less than 100 words) of the	
study that outlines the most innovative and important arguments	[Y]
and core contents of the paper and will serve to effectively attract	
readers.

15	The 'INTRODUCTION' section clearly describes the relevant background information for the study. Only the most relevant and current (within the past 5 years) literature is cited, with the exception of rare instances of seminal literature citations. All technical terms and/or abbreviations are explained and/or defined, with the full name of abbreviations given upon first appearance in the text and the abbreviation presented in parentheses [i.e., "computed tomography (CT)"]. First-person pronouns (e.g., 'I', 'we') are used appropriately to clearly indicate the work performed by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the current study, the information is presented carefully.	[Y]
16	The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.	[N]
17	The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure (<i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.	[N]
18	Statistical symbols are accurate. Statistical significance is expressed as ${}^aP < 0.05$, ${}^bP < 0.01$ ($P > 0.05$ usually does not need to be denoted). If there are other series of P values, ${}^cP < 0.05$ and ${}^dP < 0.01$ are used, and a third series of P values is expressed as ${}^eP < 0.05$ and ${}^fP < 0.01$. Statistical data is expressed as mean \pm SD or mean \pm SE.	[N]

The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings. The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (i.e., providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (i.e., useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work. The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format. The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name (i.e., "Pang et al"). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Mal"! reported," "Pan et al ^[2-5] indicated,"; "PCR has a high sensitivity ^[6-9] ." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text (e.g., Pan et al ^[2-5] , please see reference [8]).			
(3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings. Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazin); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version. The number of cited references is appropriate for the article type, as follows: Commentary: no less than 50; Review: no less than 100; Article: no less than 30/26; Case Report and Letter to the Editor: no less than 1. The ethics-related statements are provided in accordance with the manuscript type (e.g., Manuscript NoInstitutional review board statement, Manuscript NoAnimal care and use statement, etc.). The names of the peer reviewers and the scientific editor are present at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang JL). The order and numerical labeling of tables and figures is consistent with their appearance and presentation in the text. Symbols in tables (e.g., +, -, x, *, *) correctly correspond to the definitions in the footnotes. Only one legend is provided for each multi-panel figure consisting of color graphs, black and white graphs, or line graphs that depicts data of the same theme. For example: Figure 1 Pathological changes in atrophic gastritis tissue before and after treatment. A:; B:; C:; D:; E:; F: Split pictures include flow charts, line graphs, histograms, and graphs including text. Unsplit pictures include meta-analysis
