

## **SPECIFIC COMMENTS TO AUTHORS**

This study investigated the clinical effects of lyophilized recombinant human brain natriuretic peptide in patients with chronic heart failure. The study is overall well designed. The results are very interesting. Comments: 1. The manuscript requires a minor editing. Some minor language polishing should be revised. And please take attention about the abbreviations. 2. Please check the sentence of “The poison is three-thirds of ice cream, Push: Let's see if there's a six-meter theory in the world. In the last few months, the five-dollar pharmaceuticals ....”, in the last of the discussion. It seems not related to the study. Please check and delete it. 3. The limit of the study should be list and discussed. 4. The references list should be edited with PMID and DOI.

## **SPECIFIC COMMENTS TO AUTHORS**

This is an interesting study of the potential of lyophilised recombinant human BNP therapy as a safe and effective treatment for chronic heart failure patients. The manuscript is well written. The reviewer recommends to accept it after a minor editing. Thank you.

### **I , Answer Reviewer #1:**

Dear reviewers, all authors have revised the whole manuscript.

### **II , Answer Reviewer #2:**

Thank you very much for your valuable comments and suggestions on our study. We have carefully read and considered each suggestion, and our specific responses are as follows:

1.We will re-edit the manuscript and have a native English speaker with expertise in this field perform language editing and abbreviation modifications to improve the readability and accuracy of the article.

2.We will carefully check for any errors in the manuscript and remove any irrelevant content in the discussion section to make it more professional and concise.

3.We will supplement the limitations of the study to explain the shortcomings of the research, which will help readers better understand the reliability and applicability of the research results.

4.We will edit the reference list using PMID and DOI to meet academic standards.

Once again, we sincerely appreciate your valuable comments and suggestions, which will greatly help us improve the manuscript and enhance the quality of our research.

### **III, Answer Company editor-in-chief:**

Thank you for the editor's review and support. We are honored to receive your attention and valuable feedback. We will revise our manuscript based on the peer-review report, editorial comments, and author's guidelines and submit the revised version within the specified timeframe.

We have taken note of your request to shorten the article title to comply with the journal's requirements. Additionally, we will provide standard three-line tables as requested and ensure that each cell's content adheres to the editorial guidelines. We will also align lines in each row or column and avoid using line breaks or spaces to replace lines or vertical bars in the table. We will not segment cell content.

Once again, we appreciate the editor's support and valuable feedback. We will work diligently to revise our manuscript and ensure that it meets the quality standards required for publication in the journal.
