SPECIFIC COMMENTS TO AUTHORS

This is a review article with several amino acid metabolism characteristics in colorectal cancer. I have the following comment. Regarding the location of the reference. Please move it to the end of the sentence, not in the middle of the sentence. When you are referring to more than one person, please add "et al". Ex) Li6 found that Gln deprivation..... → Li et al. found that CRC cells.6

SPECIFIC COMMENTS TO AUTHORS

The authors reviewed the several specific amino acid metabolism characteristics in colorectal cancer. The manuscript is interesting but I think that the authors could improve the paper. 1) Why the authors did not evaluate also the impact of the amino acid metabolism in the treatment of CRC ? 2) The discussion could be more detailed and well finalized 3) The language has to be improved 4) There are different typing errors, such as U.S.At present or limited.Clinically,
