

## BIOSTATISTIC STATEMENT

May 12, 2023

**Title:** Effectiveness and Safety of Direct Oral Anticoagulants versus Warfarin in Patients with Atrial Fibrillation and Chronic Kidney Disease

Number ID: 00630186

The statistical methods of this study were reviewed by the President of StatSciences service from StatSciences Inc., Notre-Dame-de-l'Île-Perrot, Montreal, Quebec, Canada.

Marc Dorais has bachelor's degree in mathematics (statistical orientation) as well as a master's degree in statistics from the Department of Mathematics and Statistics of the University of Montreal. Marc Dorais has an excellent expertise in the various observational research designs. In fact, he has currently 26 years of experience in the field of observational research and he has authored/co-authored several publications in the field. Again, it is essential to have an excellent knowledge of the structure of administrative data (e.g. RAMQ, Med-Echo, Institut de la statistique du Québec) as well as the validation and management of this data. Marc has accumulated more than 20 years of expertise in the validation and management of this administrative data. In addition, he also has long-standing expertise in the construction of prospective cohorts integrating longitudinal clinical data with those from administrative databases.
