SPECIFIC COMMENTS TO AUTHORS

Reyes CM et al presented an interesting case of pulmonary carcinoid that has carcinoid syndrome as reflected as ulcerative colitis. Indeed, this is the first report for such clinical presentation and was valuable for precise diagnosis as well as treatment for such cases in future. The paper was well written and all the necessary information are clearly arranged. I have only one comment for the paper: it would be more perfect that if the authors could discuss about the potential mechanism for the pulmonary carcinoid induced ulcerative colitis.

SPECIFIC COMMENTS TO AUTHORS

Carcinoid syndrome caused by a pulmonary carcinoid mimics intestinal manifestations of ulcerative colitis is rare case. The pulmonary carcinoid requires surgery.
