ready for the first decision.

Company Editor-in-Chief: I have reviewed the Peer-Review Report, the full text of the manuscript, the relevant ethics documents, and the English Language Certificate, all of which have met the basic publishing requirements of the World Journal of Gastroenterology, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors. Please authors are required to provide standard three-line tables, that is, only the top line, bottom line, and column line are displayed, while other table lines are hidden. The contents of each cell in the table should conform to the editing specifications, and the lines of each row or column of the table should be aligned. Do not use carriage returns or spaces to replace lines or vertical lines and do not segment cell content. Before final acceptance, when revising the manuscript, the author must supplement and improve the highlights of the latest cutting-edge research results, thereby further improving the content of the manuscript. To this end, authors are advised to apply a new tool, the Reference Citation Analysis (RCA). RCA is an artificial intelligence technology-based open multidisciplinary citation analysis database. In it, upon obtaining search results from the keywords entered by the author, "Impact Index Per Article" under "Ranked by" should be selected to find the latest highlight articles, which can then be used to further improve an article under

| | scientific significance are emphasized. Data is presented in either | |
| 17 | the text, a table or figure (<i>i.e.</i> , chart, diagram, graph or image), but is | [N] |
| 1/ | not repeated among each. Information presented in the tables and | [1/1] |
| | | |
| | figures clearly describes the trends, meaning, and inferences. | |
| | Results described in textual form are accurate, concise and clear. | |

| | Statistical symbols are accurate. Statistical significance is expressed | |
|----|--|-----|
| 18 | as ${}^{a}P$ < 0.05, ${}^{b}P$ < 0.01 (P > 0.05 usually does not need to be denoted). | |
| | If there are other series of P values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used, | [N] |
| | and a third series of P values is expressed as $^{e}P < 0.05$ and $^{f}P < 0.01$. | |
| | Statistical data is expressed as mean \pm SD or mean \pm SE. | |
| | The 'DISCUSSION' section (1) describes the main purpose and | |
| | hypothesis of the study; (2) summarizes the most important results; | |
| | (3) illustrates and explains the results (but does not simply repeat | |
| 40 | the data) and draws conclusions or inferences based on the results; | |
| 19 | (4) points out the limitations of the study and their impact on the | [Y] |
| | results, as well as proposes further advice on future research | |
| | topic(s) or direction(s); and (5) describes the theoretical significance | |
| | and practical value of the findings. | |
| | The 'ACKNOWLEDGEMENTS' section expresses gratitude to any | |
| | individuals or organizations for technical support (i.e., providing | |
| | instrumentation, equipment or experimental materials, and/or | [N] |
| 20 | assistance in experimental work), non-technical services (i.e., useful | |
| | inspiration, suggestions, guidance, or review), and/or any other | |
| | auxiliary work. | |
| 24 | The 'ARTICLE HIGHLIGHTS' section provides comments for | 5.1 |
| 21 | original articles in accordance with the specified format. | [N] |
| | The 'REFERENCES' section lists the references in the Vancouver | |
| | style. This style uses Arabic numeral in-text citations based on the | |
| | order of the first appearance of a source in the text. For citations | |
| 22 | where the author's name is indicated in the text, a superscript | |
| | number should be placed following the name (i.e, "Pang et al"). For | [Y] |
| | citations where no author is indicated, a superscript number should | |
| | be placed at the end of the sentence. Respective examples are: "Ma[1] | |
| | reported", "Pan et al[2-5] indicated"; "PCR has a high | |
| | sensitivity ^[6,9] ." No superscript numbers are used when the | |
| | sensitivity ^[6,9] ." No superscript numbers are used when the | |

| | reference number is described in the text; for example, "The | |
|----|--|-----|
| | experimental method used has been described in reference [8]." The | |
| | style of reference citations in tables is the same as that in the text | |
| | (e.g., Pan et al ^[2-5] , please see reference [8]). | |
| | | |

| | Journal references have been verified to ensure that there are no | |
| | duplicate references and that the PMID numbers are correct. For | |
| | references not yet included in PubMed: the name of Chinese | |
| | journals is spelled out using Chinese Pinyin, with the first letter of | |
| 23 | each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of | [Y] |
| | journals in other languages are listed according to indexing | |
| | information retrieved from Google. Book references are presented | |
| | with all the information relevant to the electronic version. | |
| | The number of cited references is appropriate for the article type, as | |
| | follows: | |
| | Commentary: no less than 50; | |
| 24 | Review: no less than 100; | [Y] |
| | Article: no less than 30/26; | |
| | Case Report and Letter to the Editor: no less than 1. | |
| | The ethics-related statements are provided in accordance with the | |
| 25 | manuscript type (e.g., Manuscript NoInstitutional review board | [N] |
| | statement, Manuscript NoAnimal care and use statement, etc.). | |
| | The names of the peer reviewers and the scientific editor are present | |
| 26 | at the end of the paper (e.g., P-Reviewer: Hugot D S-Editor: Wang | [Y] |
| | JL). | |
