## SPECIFIC COMMENTS TO AUTHORS

There are too many abbreviations in the title and abstract of the article. There is no harm in using universally known abbreviations, but using so many abbreviations can bore the reader. fix this if possible. There are too many assertive statements (like first, only) both in the title and in the text. Instead of using such expressions in the academic community, softer expressions that start with "according to our knowledge" should be used. For example, what ELL is should be stated in the introduction. It was stated that financial support was received for this study. I don't understand what kind of support is needed for a case report and I'm definitely waiting for it to be explained. It was stated that NGS and flow cytometry were used in the diagnosis. A few images should be used in this regard.
