**Science Editor:** I have sent the edited manuscript to the author(s) for proofreading. The author(s) replied that there is a need to change the manuscript. Please see the remarks for the content of the reply and the attachment for the email record of communication with the author(s). (发件人: 张春<zc715866@163.com> 收件人: y.l.chen<y.l.chen@wjgnet.com> 时间: 2023 年 8 月 12 日 (周六) 00:09 大小: 188 KB Dear Editor Chen, Thank you for the editing of this paper, all authors jointly examined and read the Ms Word document carefully, paying close attention to the information presented for column type, titles (main and short), authors, affiliated institutions, abstract, text, there was nothing wrong with it. However, there is a slight error in the position pointed by the black arrow in picture 2A, please help to correct it, thank you! Best regards, Gui-fang Lv)

Company Editor-in-Chief: I recommend the manuscript to be published in the World Journal of Clinical Cases. Before final acceptance, when revising the manuscript, the author must supplement and improve the highlights of the latest cutting-edge research results, thereby further improving the content of the manuscript. To this end, authors are advised to apply a new tool, the Reference Citation Analysis (RCA). RCA is an artificial intelligence technology-based open multidisciplinary citation analysis database. In it, upon obtaining search results from the keywords entered by the author, "Impact Index Per Article" under "Ranked by" should be selected to find the latest highlight articles,

**Telephone:** +1-925-399-1568 **E-mail:** bpgoffice@wjgnet.com

which can then be used to further improve an article under	
preparation/peer-review/revision. Please visit our RCA database	
for more information at:

	exception of rare instances of seminal literature citations. All	
	technical terms and/or abbreviations are explained and/or defined,	
15	with the full name of abbreviations given upon first appearance in	[] []
13	the text and the abbreviation presented in parentheses [i.e.,	[Y ]
	"computed tomography (CT)"]. First-person pronouns (e.g., 'I',	
	'we') are used appropriately to clearly indicate the work performed	
	by the author(s). When weaknesses of previous studies are	
	described in the text to highlight the innovations related to the	
	current study, the information is presented carefully.	
	The 'MATERIALS AND METHODS' section clearly and accurately	
16	describes all materials and methods used to obtain the data	INI 1
10	presented in the article and is adequate for a reader to repeat the	[N]
	study.	
	The 'RESULTS' section concisely describes the observational and	
	experimental results. Representative data and data that have	
	scientific significance are emphasized. Data is presented in either	
17	the text, a table or figure (i.e., chart, diagram, graph or image), but is	[N ]
	not repeated among each. Information presented in the tables and	
	figures clearly describes the trends, meaning, and inferences.	
	Results described in textual form are accurate, concise and clear.

18	Statistical symbols are accurate. Statistical significance is expressed	
	as ${}^{a}P$ < 0.05, ${}^{b}P$ < 0.01 ( $P$ > 0.05 usually does not need to be denoted).	
	If there are other series of $P$ values, $^{c}P < 0.05$ and $^{d}P < 0.01$ are used,	[N ]
	and a third series of $P$ values is expressed as $^{\rm e}P$ < 0.05 and $^{\rm f}P$ < 0.01.	
	Statistical data is expressed as mean $\pm$ SD or mean $\pm$ SE.	
	The 'DISCUSSION' section (1) describes the main purpose and	
	hypothesis of the study; (2) summarizes the most important results;	
	(3) illustrates and explains the results (but does not simply repeat	
10	the data) and draws conclusions or inferences based on the results;	F2/ 1
19	(4) points out the limitations of the study and their impact on the	[Y ]
	results, as well as proposes further advice on future research	
	topic(s) or direction(s); and (5) describes the theoretical significance	
	and practical value of the findings.	
	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any	
	individuals or organizations for technical support (i.e., providing	
20	instrumentation, equipment or experimental materials, and/or	ENT. 1
20	assistance in experimental work), non-technical services (i.e., useful	[N ]
	inspiration, suggestions, guidance, or review), and/or any other	
	auxiliary work.	
21	The 'ARTICLE HIGHLIGHTS' section provides comments for	INI 1
21	original articles in accordance with the specified format.	[N ]
	The 'REFERENCES' section lists the references in the Vancouver	
	style. This style uses Arabic numeral in-text citations based on the	
	order of the first appearance of a source in the text. For citations	
22	where the author's name is indicated in the text, a superscript	
	number should be placed following the name (i.e, "Pang et al"). For	[Y ]
	citations where no author is indicated, a superscript number should	
	be placed at the end of the sentence. Respective examples are: "Ma <sup>[1]</sup>	
	reported", "Pan et al <sup>[2-5]</sup> indicated"; "PCR has a high	
	sensitivity <sup>[6,9]</sup> ." No superscript numbers are used when the

	reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text (e.g., Pan et al <sup>[2-5]</sup> , please see reference [8]).	
23	Journal references have been verified to ensure that there are no duplicate references and that the PMID numbers are correct. For references not yet included in PubMed: the name of Chinese journals is spelled out using Chinese Pinyin, with the first letter of each word capitalized (e.g., Shijie Huaren Xiaohua Zazhi); the name of journals in other languages are listed according to indexing information retrieved from Google. Book references are presented with all the information relevant to the electronic version.	[Y ]
24	The number of cited references is appropriate for the article type, as follows:  Commentary: no less than 50;  Review: no less than 100;  Article: no less than 30/26;  Case Report and Letter to the Editor: no less than 1.	[Y ]
25	The ethics-related statements are provided in accordance with the manuscript type ( <i>e.g.</i> , Manuscript NoInstitutional review board statement, Manuscript NoAnimal care and use statement, <i>etc.</i> ).	[Y ]
26	The names of the peer reviewers and the scientific editor are present at the end of the paper ( <i>e.g.</i> , P-Reviewer: Hugot D S-Editor: Wang JL).	[Y ]

	The order and numerical labeling of tables and figures is consistent	
	with their appearance and presentation in the text. Symbols in	
	tables (e.g., +, -, ×, $\div$ , *) correctly correspond to the definitions in the	
27	footnotes. Only one legend is provided for each multi-panel figure	[Y ]
21	consisting of color graphs, black and white graphs, or line graphs	[1]
	that depicts data of the same theme. For example: Figure ${\bf 1}$

Responsibilities of scientific editors	The primary responsibilities of our scientific editors include carefully checking the entire manuscript and all accompanying materials for: (1) errors in spelling, grammar, punctuation and wording; (2) suitability of tables, figures, figure data and legends; (3) accurate and appropriate presentation of symbols (e.g. +, -, ×, ÷, %, *) in tables and figures; and (4) complete and comprehensive revision of the manuscript		
	according to the reviewers' comments.
