SPECIFIC COMMENTS TO AUTHORS

The authors present the case of hepatobiliary tuberculosis. The case presentation is so interesting, however, I have some concerns to discuss. -What is the difference between hepatobiliary and soft tissue? Please discuss with reference the following article. Tuberculoma with phlegmon-like symptoms mimicking soft tissue sarcoma in the wrist: A case report. Mol Clin Oncol. 2018 Aug;9(2):207-210. doi: 10.3892/mco.2018.1652. Epub 2018 Jun 12. PMID: 30101023; PMCID: PMC6083412. -Is any side effect occur?

SPECIFIC COMMENTS TO AUTHORS

It was an awesome work. I would love to know how you avoided bias and errors from database/library selection. I could see that most articles were from pubmed/medline. Also, how have you made sure that you didn't report (only) a selection of statistically significant outcomes that suits your interest in this study
