Respected Sir/Madam

**Reference#: 86861**

**Title: Systemic treatment for advanced pancreatic cancer**

I am hereby giving points response to your comments;

### **Reviewer #1**

**Comment #1:** 1. The author should add a section to elaborate on the mechanism of advanced pancreatic cancer. This new section can correspond to the later treatment part.

**Author answer:** Thank you very much for your valuable comments. I do agree with the comments and already added a paragraph regarding advanced pancreatic cancer.

**Comment #2:** 2. Please present the main results of the review in a tabular format, including information on the treatment methods studied, the main conclusion, and the authors.

**Author answer:** Thank you for your suggestion. I already added a table which include the authors, the treatment methods, and the main conclusion relating with advanced pancreatic cancer patients.

**Comment #3:** 3. The treatment section of the review should include some new advances, such as chemotherapy and immunotherapy, among others. According to the above, I suggest the authors should answer the questions and make a revision.

**Author answer:** Thank you for your suggestion. The new advances of chemotherapy, targeted therapy, immunotherapy (ICI, CAR-T cells, and cancer vaccines) are already included in the review.

### **Reviewer #2**

**Comment #1:** This article reviews the comprehensive treatment of advanced pancreatic cancer. Among them, the content of chemotherapy is old and lacks the latest progress. It is suggested to reduce the length of this section appropriately. It seems to lack an introduction to other treatments, such as radiation therapy and supportive care.

**Author answer:** Thank you for the important comments and advice. The content of chemotherapy is the latest regimens for advanced pancreatic cancer treatment. This review was concise about systemic treatment of advanced pancreatic cancer so we did not touch about radiation therapy and supportive care.

Best regards,
