

Reviewer #1:

Scientific Quality: Grade C (Good)

Language Quality: Grade B (Minor language polishing)

Conclusion: Major revision

Specific Comments to Authors: I think the manuscript is way too long esp the discussion. Please ask the authors to consider the revision down to only 2 pages to discuss only the main findings that are related to the case presentation and finding.

Answer to review #1:

We would like to give a great appreciation for reviewing our work. We went through bunch of repairs and assortments of whole discussion section, cutting and compressing down the entire discussion to total of 2 pages, as recommended, trying to only remaining important and relevant discussions with the case presentation and finding. We have highlighted the discussion sections in the revised manuscript. Also, we went through extensive language editing of entire manuscript from recommended editing company Editage with a new language editing certification from the company.

Reviewer #2:

Scientific Quality: Grade B (Very good)

Language Quality: Grade B (Minor language polishing)

Conclusion: Accept (General priority)

Specific Comments to Authors: Thank you for submitting this case report. It is well written.

Answer to review #2:

It is our honor to have our work reviewed, thank for your effort. We went through extensive language editing of entire manuscript from recommended editing company Editage, with a new language editing certification from the company.
