

Reviewer #1:

Scientific Quality: Grade C (Good)

Language Quality: Grade B (Minor language polishing)

Conclusion: Minor revision

Specific Comments to Authors: This is an interesting study on the effects of glucocorticoids, antihistamines and leukotriene receptor antagonists on patients with allergic rhinitis and their influence on serum inflammatory indexes. After a minor revision, it can be accepted for publication. 1. The abstract is too long, please short it. Especially the methods and results section. 2. A short background should be added to the abstract. 3. Tables should be double checked and moved to the end of the manuscript.

The abstract part has been carefully revised, background introduction has been added, and the content statement of the method and result part has been streamlined. In addition, the table has been adjusted to the end of the document.

Reviewer #2:

Scientific Quality: Grade C (Good)

Language Quality: Grade B (Minor language polishing)

Conclusion: Minor revision

Specific Comments to Authors: In this study, the authors examined the impact of glucocorticoids, antihistamines, and leukotriene receptor antagonists on individuals diagnosed with allergic rhinitis, specifically focusing on their influence on serum inflammatory indexes. The study is well designed and performed. The findings are interesting. Comments: 1. The manuscript should be edited carefully according to the journal's guideline. 2. Some minor language polishing should be revised. 3. The last paragraph should be divided to limit and conclusion.

The whole text has been checked and carefully revised. The last part has been adjusted into two parts: research limitations and conclusions.
