SPECIFIC COMMENTS TO AUTHORS

This paper can be of interest. The paper is logically organized and well written. Ectopic pancreas should be kept in mind in specific context, the most important and relevant when considering endoscopy and/or small biopsies, when a diagnostic assessment can be very difficult. By a transplant pathologist perspective this can have a significant impact on timing and results of the donor assessment. This issue has to be discussed in your intro or discussion for the potential issue on timing and consequences, quoting PMID: 37218806, PMID: 32746498
