**SPECIFIC COMMENTS TO AUTHORS**

Manuscript title: Intermittent spontaneous ovulation in patients with premature ovarian failure: three case reports Article type: case report Journal: World Journal of Clinical Cases Comments and Suggestions for Authors In this case-report study, the authors presented three cases of females aged between 22-33 years old diagnosed with premature ovarian failure. Main data indicate that young patients with premature ovarian failure can experience unpredictable and intermittent spontaneous follicle development, ovulation, and even natural pregnancy. In my opinion, the publication of this work in World Journal of Clinical Cases is recommended. Please see below several comments and minor observations for improving the manuscript in order to make it suitable for publication in World Journal of Clinical Cases. a) The work is in general well written and in general easy to follow. The work is also highly detailed, well conducted, and well organized. The clinical history of the three patients is well detailed. b) the majority of references in the field are covered, while papers adequately described and critically discussed in the context of study findings. The scientific writing is good. Figures are highly explicative and clear. c) Figures and tables are highly explicative and

clear. d) More details on the Intermittent spontaneous ovulation should be included as background. Authors can check PMID: 26291617 and PMID: 30357029 e) The work should be carefully revised for the presence of typos. f) Line 165 follicular maturity disorders also included infections (PMID:34970247 and PMID: 33556108), this notion should be included alongside supporting references g) Line 167 The global menopause mean age should be included h) Lines 200-203 these sentences would better fit at the beginning of the discussion
