Epub 2013 Dec 27. Is unicompartmental-to-unicompartmental revision knee arthroplasty a reliable option? Case-control study J A Epinette 1, M Leyder 2, D Saragaglia 3, G Pasquier 4, G Deschamps 5; Société Française de la Hanche et du Genou PMID: 24373806 DOI: 10.1016/j.otsr.2013.10.013 Unicompartmental Knee arthroplasty - metallosis has been reported earlier uni on uni revision has also been described The report has been written well The discussion has to be modified to present the unique features that are different from existing literature

Thanks for your comments. We revised as you suggested, and we discussed the references that you suggested.

I have reviewed the Peer-Review Report, full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Orthopedics, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors. Before final acceptance, uniform presentation should be used for figures showing the same or similar contents; for example, "Figure 1 Pathological changes of atrophic gastritis after treatment. A: ...; B: ...; C: ...; D: ...; E: ...; F: ...; G: ...". Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor. In order to respect and protect the author's intellectual property rights and prevent others from misappropriating figures without the author's authorization or abusing figures without indicating the source, we will indicate the author's copyright for figures originally generated by the author, and if the author has used a figure published elsewhere or that is copyrighted, the author needs to be authorized by the previous publisher or the copyright holder and/or indicate the reference source and copyrights. Please check and confirm whether the figures are original (i.e. generated de novo by the author(s) for this paper). If the picture is 'original', the author needs to add the following copyright information to the bottom right-hand side of the picture in PowerPoint (PPT): Copyright ©The Author(s) 2023. Authors are required to provide standard three-line tables, that is, only the top line, bottom line, and column line are displayed, while other table lines are hidden. The contents of each cell in the table should conform to the editing specifications, and the lines of each row or column of the table should be aligned. Do not use carriage returns or spaces to replace lines or vertical lines and do not segment cell content.

Thanks for your comments. We revised as you suggested, and we discussed the references that you suggested. We uploaded the figures as pptx.
