

Reviewer #1:

**Scientific Quality:** Grade B (Very good)

**Language Quality:** Grade B (Minor language polishing)

**Conclusion:** Accept (General priority)

**Specific Comments to Authors:** The manuscript is a logical and scientific critique.

For this reason, it should be significant to publish. However, the title is

inflammatory and inappropriate for the title of a scientific paper.

**Authors:** We are grateful to the reviewer for the encouraging and instructive comments. Based on the Reviewer's suggestion, the title of the manuscript has been revised to "Lyophilized recombinant human brain natriuretic peptide: A promising therapy in patients with chronic heart failure".

#### **EDITORIAL OFFICE'S COMMENTS**

Authors must revise the manuscript according to the Editorial Office's comments and suggestions, which are listed below:

##### **(1) Science editor:**

发件人: 德嶺讓芳 主题: Re: Reviewer's Code: 03107200 - Manuscript peer review invitation for World Journal of Clinical Cases Manuscript NO: 88186 日期: 2023 年 11 月 29 日(周三) 20:24 收件人: BPG Editorial Office Dear Editorial Office, I could not send my review using the F6 publishing system. Therefore, I would like to send it using this email.

##### **(2) Company editor-in-chief:**

I have reviewed the Peer-Review Report, full text of the manuscript, and the relevant ethics documents, all of which have met the basic publishing requirements of the World Journal of Clinical Cases, and the manuscript is conditionally accepted. I have sent the manuscript to the author(s) for its revision according to the Peer-Review Report, Editorial Office's comments and the Criteria for Manuscript Revision by Authors. Please provide the original figure documents. Please prepare and arrange the figures using PowerPoint to ensure that all graphs or arrows or text portions can be reprocessed by the editor. In order to respect and protect the author's intellectual property rights and prevent others from misappropriating figures without the author's authorization or abusing figures without indicating the source, we will indicate the author's copyright for figures originally generated by the author, and if the author has used a figure published elsewhere or that is copyrighted, the author needs to be authorized by the previous publisher or the copyright holder and/or indicate the reference source and copyrights. Please check and confirm whether the figures are original (i.e. generated de novo by the author(s) for this paper). If the picture is 'original', the author needs to add the following copyright information to the bottom right-hand side of the picture in PowerPoint (PPT): Copyright ©The Author(s) 2023. When revising the manuscript, it is recommended that the author supplement and improve the highlights of the latest cutting-edge research results, thereby further improving the content of the manuscript. To this end, authors are advised to apply PubMed, or a new tool, the RCA, of which data source is PubMed. RCA is a unique artificial intelligence system for citation index evaluation of medical science and life science literature. In it, upon obtaining search results from the keywords entered by the author, "Impact Index Per Article" under "Ranked by" should be selected to find the latest highlight articles, which can then be used to further improve an article under preparation/peer-review/revision. Please visit our RCA database for more information at: <https://www.referencecitationanalysis.com/>, or visit PubMed at: <https://pubmed.ncbi.nlm.nih.gov/>.

**Authors:** We are grateful to the Science Editor and Company Editor-in-Chief for their important comments. The manuscript has been revised according to the Editorial Office's comments and suggestions.
