SPECIFIC COMMENTS TO AUTHORS

The present review introduced the concept of metabolic syndrome (MetS), and cardiometabolic disorders including type 2 diabetes, dyslipidemia and so on and discussed their relationships with MASLD. The review is overall well written and up-to-date. Some minor points are listed as below. 1. Diabetes Mellitus type 2 is not a commonly used nomenclature. Type 2 diabetes is recommended to be used. 2. Some grammar mistakes should be corrected and the written language should be modified.
