

## ANSWERING REVIEWERS

January 29, 2014

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 8906-edited.doc).

**Title: A pilot proof-of-concept study of a modified device for one-step EUS-guided biliary drainage in a new experimental biliary dilatation animal model**

**Author:** Tae Hoon Lee, Jun Hyuck Choi, Sang Soo Lee, Hyun Deuk Cho, Dong Wan Seo, Sang-Heum Park, Sung Koo Lee, Myung-Hwan Kim, Do Hyun Park

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 8906

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated.

2 Revision has been made according to the suggestions of the reviewer

- (1) EUS-BD is a well-described technique on previous numerous reports. As a reviewer recommended, we added more descriptions about the technical procedure in method to clarify the procedure.
- (2) The assessment of an available bile duct dilatation model is not the main issue of our study. But the process about it was also needed to understand for readers. The figure 2 may be difficult to understand it. So we think that the explanation about it may be needed.  
Thank you.

3 References and typesetting were corrected.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Tae Hoon Lee'.
