	Editorial Office's Comments	
	Science Editor: We are very pleased to receive your revised	
	manuscript (No. 89444). However, after our verification, we found	
	that the language editing company mentioned in your submitted	
	language certificate only polished the initial manuscript. Following	
	the many changes that were introduced into the content of your	
	manuscript during the revision process, some language problems	
	exist in the revised manuscript. Further language polishing is	
	required to fix all grammatical, syntactical, formatting and other	
	related errors, in order to meet the publication requirement (Grade	
2	A). Now, you are requested to send the revised manuscript to a	[Y]
	professional English language editing company or a native	
	English-speaking expert to polish the language further. When you	
	submit the subsequent polished manuscript to us, you must provide	
	a new language certificate along with it. Once this step is	
	completed, your manuscript will be quickly accepted and published	
	online. Please visit the following website for the professional	
	English language editing companies we recommend:	
	https://www.wjgnet.com/bpg/gerinfo/240. Please complete all	
	the revisions based on the version of "3062-89444_Auto_Edited-v1",	
	and upload above mentioned files in a ".zip" file.

	Company Editor-in-Chief: I have reviewed the Peer-Review	
	Report, and full text of the manuscript, all of which have met the	
	basic publishing requirements of the World Journal of	
	Gastrointestinal Surgery, and the manuscript is conditionally	
	accepted. I have sent the manuscript to the author(s) for its revision	
	according to the Peer-Review Report, Editorial Office's comments	
	and the Criteria for Manuscript Revision by Authors. When revising	
	the manuscript, it is recommended that the author supplement and	
	improve the highlights of the latest cutting-edge research results,	
	thereby further improving the content of the manuscript. To this	
	end, authors are advised to apply PubMed, or a new tool, the RCA,	
	of which data source is PubMed. RCA is a unique artificial	
	intelligence system for citation index evaluation of medical science	
	and life science literature. In it, upon obtaining search results from	
	the keywords entered by the author, "Impact Index Per Article"	
	under "Ranked by" should be selected to find the latest highlight	
	articles, which can then be used to further improve an article under	
	preparation/peer-review/revision. Please visit our RCA database	
	for more information at:	
	https://www.referencecitationanalysis.com/, or visit PubMed at:	
	https://pubmed.ncbi.nlm.nih.gov/.

	listed in the signed BPG Copyright License Agreement form.	
	The 'Author contributions' passage describes the specific	
	contribution(s) made by each author. The author's names are listed	
	in the following format: full family (sur)name followed by	
	abbreviated first and middles names.	
	e.g., "Wang CL and Liang L contributed equally to this work; Wang

	the research; Xue JZ and Lu JR contributed new reagents and	
	analytic tools; Wang CL, Liang L and Fu JF analyzed the data; and	
	Wang CL, Liang L and Fu JF wrote the manuscript. All authors	
	have read and approve the final manuscript."	
	The 'Supported by' statement describes the source(s) of financial	
8	support and includes the corresponding identification number(s)	[N]
	and program ID(s) if available, and contains no spelling errors.	
	The 'Corresponding author' passage provides the corresponding	
	author's full first and family (sur)names, abbreviated title (e.g., MD,	
9	PhD), affiliated institute's name and complete postal address	[Y]
	(including zip code) and e-mail (written in all lowercase), and	
	contains no spelling errors.	
	The Manuscript Tracking information (i.e., Received, Peer review

15	The 'INTRODUCTION' section clearly describes the relevant background information for the study. Only the most relevant and current (within the past 5 years) literature is cited, with the exception of rare instances of seminal literature citations. All technical terms and/or abbreviations are explained and/or defined, with the full name of abbreviations given upon first appearance in the text and the abbreviation presented in parentheses [<i>i.e.</i> , "computed tomography (CT)"]. First-person pronouns (<i>e.g.</i> , 'I', 'we') are used appropriately to clearly indicate the work performed by the author(s). When weaknesses of previous studies are described in the text to highlight the innovations related to the current study, the information is presented carefully.	[Y]
16	The 'MATERIALS AND METHODS' section clearly and accurately describes all materials and methods used to obtain the data presented in the article and is adequate for a reader to repeat the study.	[Y]
17	The 'RESULTS' section concisely describes the observational and experimental results. Representative data and data that have scientific significance are emphasized. Data is presented in either the text, a table or figure (<i>i.e.</i> , chart, diagram, graph or image), but is not repeated among each. Information presented in the tables and figures clearly describes the trends, meaning, and inferences. Results described in textual form are accurate, concise and clear.	[Y]
18	Statistical symbols are accurate. Statistical significance is expressed as ${}^{a}P < 0.05$, ${}^{b}P < 0.01$ ($P > 0.05$ usually does not need to be denoted). If there are other series of P values, ${}^{c}P < 0.05$ and ${}^{d}P < 0.01$ are used, and a third series of P values is expressed as ${}^{c}P < 0.05$ and ${}^{f}P < 0.01$. Statistical data is expressed as mean \pm SD or mean \pm SE.	[Y]

Telephone: +1-925-399-1568 **E-mail:** office@baishideng.com https://www.wjgnet.com

19	The 'DISCUSSION' section (1) describes the main purpose and hypothesis of the study; (2) summarizes the most important results; (3) illustrates and explains the results (but does not simply repeat the data) and draws conclusions or inferences based on the results; (4) points out the limitations of the study and their impact on the	[Y]
	results, as well as proposes further advice on future research topic(s) or direction(s); and (5) describes the theoretical significance and practical value of the findings.	
20	The 'ACKNOWLEDGEMENTS' section expresses gratitude to any individuals or organizations for technical support (<i>i.e.</i> , providing instrumentation, equipment or experimental materials, and/or assistance in experimental work), non-technical services (<i>i.e.</i> , useful inspiration, suggestions, guidance, or review), and/or any other auxiliary work.	[N]
21	The 'ARTICLE HIGHLIGHTS' section provides comments for original articles in accordance with the specified format.	[Y]
22	The 'REFERENCES' section lists the references in the Vancouver style. This style uses Arabic numeral in-text citations based on the order of the first appearance of a source in the text. For citations where the author's name is indicated in the text, a superscript number should be placed following the name (<i>i.e</i> , "Pang <i>et al</i> "). For citations where no author is indicated, a superscript number should be placed at the end of the sentence. Respective examples are: "Mal¹¹¹ reported", "Pan <i>et al</i> ¹²-5¹ indicated"; "PCR has a high sensitivity¹6,9¹." No superscript numbers are used when the reference number is described in the text; for example, "The experimental method used has been described in reference [8]." The style of reference citations in tables is the same as that in the text (<i>e.g.</i> , Pan <i>et al</i> ¹²-5¹, please see reference [8]).	[Y]
