

Language Editing Certification

To whom it may concern:

The entire manuscript, entitled by “A CT-Based Radiomics Diagnostic Approach for Differential Diagnosis between Early- and Late-stage Pancreatic Ductal Adenocarcinoma”, has been professionally edited for English usage, grammar, spelling, and punctuation by Dr. John Hugh Snyder, a native English speaker and a skilled professional editor with a Ph.D. in biochemistry from Cornell University. Therefore, it would be highly appreciated if the comments on language could be as specific as possible.
