SPECIFIC COMMENTS TO AUTHORS

A good case reports, but too long for a single case (~ 5000 words) - please be more concise, and report only relevant data and findings. The term "aggressive" is inflated - you better use a more smooth synonym (intensive, elaborate...) Nifedipine for hypertension is somehow obsolete. Any reason for choosing that ? "antibiotic regimen was downgraded " - another awkward expression (?) Switched to ? Figure 2 : neoplastic nodule (?) It has resulted it was not neoplastic, but rather inflammatory...if I am not wrong. Can you please rename it. Even the number of references (38) is excessive for a case report: reconsider.
