

Answering Reviewers

Reviewer 1: The case report is very interesting since mesenteric lymphangiomas or small bowel lymphangiomas are extremely rare but are a category of tumors that must be taken into account by gastroenterologists. The case is really simple but there are so many English errors that in some lines it is not comprehensible.

Response: Thank you for your helpful comments. We have performed further language polishing by AJE.

Best wishes to you and your family.
