	Item No	Recommendation	
Title and abstract	1	(a) Indicate the study's design with a commonly used term in the title or the abstract	– Pag
		(b) Provide in the abstract an informative and balanced summary of what was done	_
		and what was found Page 2	
Introduction			_
Background/rationale	2	Explain the scientific background and rationale for the investigation being reported	– Pag
Objectives	3	State specific objectives, including any prespecified hypotheses Page 3	_
Methods		State specific objectives, including any prespectived hypotheses	_
Study design	4	Present key elements of study design early in the paper Page 4-6	_
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment,	_
	3	exposure, follow-up, and data collection  Page 4-6	
Participants	6	(a) Cohort study—Give the eligibility criteria, and the sources and methods of	_
1		selection of participants. Describe methods of follow-up	
		Case-control study—Give the eligibility criteria, and the sources and methods of	
		case ascertainment and control selection. Give the rationale for the choice of cases	Pa
		and controls	4-0
		Cross-sectional study—Give the eligibility criteria, and the sources and methods of	
		selection of participants	
		(b) Cohort study—For matched studies, give matching criteria and number of	_
		exposed and unexposed	P
		Case-control study—For matched studies, give matching criteria and the number of	e 4
		controls per case	4
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect	_
		modifiers. Give diagnostic criteria, if applicable Page 4-6	
Data sources/	8*	For each variable of interest, give sources of data and details of methods of	_
measurement		assessment (measurement). Describe comparability of assessment methods if there	
		is more than one group Page 4-6	
Bias	9	Describe any efforts to address potential sources of bias Page 10	
Study size	10	Explain how the study size was arrived at Page 4 and Fig. 1	_
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable,	
		describe which groupings were chosen and why  Page 5 and Table 1	
Statistical methods	12	(a) Describe all statistical methods, including those used to control for confounding	Page
		(b) Describe any methods used to examine subgroups and interactions Pages 5-6	
		(c) Explain how missing data were addressed Pages 5-6	_
		(d) Cohort study—If applicable, explain how loss to follow-up was addressed	_
		Case-control study—If applicable, explain how matching of cases and controls was	
		addressed	Pag
		Cross-sectional study—If applicable, describe analytical methods taking account of	
		sampling strategy	
		(e) Describe any sensitivity analyses N/A	_
Continued on next rece		(c) Describe any sonstitute unaryses 1971	
Continued on next page			

Results		
Participants	13*	(a) Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed Page 4
		(b) Give reasons for non-participation at each stage Page 4
		(c) Consider use of a flow diagram Fig. 1
Descriptive 14	14*	(a) Give characteristics of study participants (eg demographic, clinical, social) and information
data		on exposures and potential confounders Page 6 and Table 2
		(b) Indicate number of participants with missing data for each variable of interest Page 4
		(c) Cohort study—Summarise follow-up time (eg, average and total amount) Pages 5-6
Outcome data	15*	Cohort study—Report numbers of outcome events or summary measures over time
		Case-control study—Report numbers in each exposure category, or summary measures of exposure  Page and F
		Cross-sectional study—Report numbers of outcome events or summary measures
Main results 1	16	(a) Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included Pages 7-8
		(b) Report category boundaries when continuous variables were categorized Pages 7-8
		(c) If relevant, consider translating estimates of relative risk into absolute risk for a meaningful
		time period N/A
Other analyses	17	
	17	time period N/A  Report other analyses done—eg analyses of subgroups and interactions, and sensitivity
Discussion	17	time period N/A  Report other analyses done—eg analyses of subgroups and interactions, and sensitivity
<b>Discussion</b> Key results		time period N/A  Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses  N/A
<b>Discussion</b> Key results	18	time period N/A  Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses  N/A  Summarise key results with reference to study objectives Pages 8-10
Discussion Key results Limitations	18	time period N/A  Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses  N/A  Summarise key results with reference to study objectives Pages 8-10  Discuss limitations of the study, taking into account sources of potential bias or imprecision.
Discussion Key results Limitations	18 19	time period N/A  Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses  N/A  Summarise key results with reference to study objectives Pages 8-10  Discuss limitations of the study, taking into account sources of potential bias or imprecision.  Discuss both direction and magnitude of any potential bias Pages 10
Discussion Key results Limitations Interpretation	18 19	Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses  N/A  Summarise key results with reference to study objectives Pages 8-10  Discuss limitations of the study, taking into account sources of potential bias or imprecision.  Discuss both direction and magnitude of any potential bias Pages 10  Give a cautious overall interpretation of results considering objectives, limitations, multiplicity
Discussion Key results Limitations Interpretation	18 19 20 21	time period N/A  Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses  N/A  Summarise key results with reference to study objectives Pages 8-10  Discuss limitations of the study, taking into account sources of potential bias or imprecision.  Discuss both direction and magnitude of any potential bias Pages 10  Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence Pages 8-10
Other analyses  Discussion Key results Limitations Interpretation Generalisability Other information	18 19 20 21	time period N/A  Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses  N/A  Summarise key results with reference to study objectives Pages 8-10  Discuss limitations of the study, taking into account sources of potential bias or imprecision.  Discuss both direction and magnitude of any potential bias Pages 10  Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence Pages 8-10

<sup>\*</sup>Give information separately for cases and controls in case-control studies and, if applicable, for exposed and unexposed groups in cohort and cross-sectional studies.

**Note:** An Explanation and Elaboration article discusses each checklist item and gives methodological background and published examples of transparent reporting. The STROBE checklist is best used in conjunction with this article (freely available on the Web sites of PLoS Medicine at http://www.plosmedicine.org/, Annals of Internal Medicine at http://www.annals.org/, and Epidemiology at http://www.epidem.com/). Information on the STROBE Initiative is available at www.strobe-statement.org.
