

This document certifies that the manuscript

**Cumulative effects of excess high-normal alanine aminotransferase levels in relation to the new-onset metabolic dysfunction-associated fatty liver disease in China: A cohort study**

prepared by the authors

**Jing-Feng Chen, Zhuo-Qing Wu, Hao-Shuang Liu, Su Yan, You-Xiang Wang, Miao Xing, Xiaoqin Song, Su-Ying Ding**

was edited for proper English language, grammar, punctuation, spelling, and overall style by one or more of the highly qualified native English speaking editors at AJE.

This certificate was issued on **January 10, 2024** and may be verified on the [AJE website](#) using the verification code **OFD2-0573-7FF8-CCFD-5B4E**.

Neither the research content nor the authors' intentions were altered in any way during the editing process. Documents receiving this certification should be English-ready for publication; however, the author has the ability to accept or reject our suggestions and changes. To verify the final AJE edited version, please visit our verification page at [aje.com/certificate](#). If you have any questions or concerns about this edited document, please contact AJE at [support@aje.com](mailto:support@aje.com).
