SPECIFIC COMMENTS TO AUTHORS

Authors are advised to consider the following minor revision points: - For the keywords: retrospective study must be included in the keywords. - In the abstract: some abbreviations like HPV and Tdap must be elaborated, authors are advised to state what each abbreviation stands for. - In the methodology, for statistical analysis, authors must replace the word "numbers" with "frequency" for categorical data expression. Also, the software GraphPad prism name should be written correctly. - In future, authors are advised to consider the influence of categorical factors on vaccination adherence by using chi-square test. - Authors are advised to correct few mistakes in punctuations like some extra spaces.
