

PEER-REVIEW REPORT

Name of journal: *World Journal of Transplantation*

Manuscript NO: 89702

Title: Association of donor hepatectomy time with liver transplantation outcomes: a multicenter retrospective study

Provenance and peer review: Unsolicited Manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 01221925

Position: Editorial Board

Academic degree: AGAF, FACS, FICS, MD, PhD

Professional title: Professor

Reviewer's Country/Territory: Greece

Author's Country/Territory: Brazil

Manuscript submission date: 2023-11-09

Reviewer chosen by: AI Technique

Reviewer accepted review: 2023-11-09 15:35

Reviewer performed review: 2023-11-09 21:56

Review time: 6 Hours

SPECIFIC COMMENTS TO AUTHORS

This is an interesting paper addressing a relatively novel question, that of the donor hepatectomy time in donors after brain death. The fact that there is no positive correlation, does not diminish the importance of the finding. Could the authors discuss the fact that there is relevant data that we have from donors after cardiac death, where the warm ischemia time is critical and where the differences may be more obvious given that there is a wider margin in the time period.
