## PEER-REVIEW REPORT

**Name of journal:** *World Journal of Clinical Cases*

**Manuscript NO:** 89783

**Title:** Metastatic clear cell sarcoma of the pancreas: A rare case report

**Provenance and peer review:** Unsolicited Manuscript; Externally peer reviewed

**Peer-review model:** Single blind

**Reviewer's code:** 01000640

**Position:** Peer Reviewer

**Academic degree:** MD, PhD

**Professional title:** Chief Physician, Doctor, Full Professor, Professor, Surgeon

**Reviewer's Country/Territory:** South Korea

**Author's Country/Territory:** China

**Manuscript submission date:** 2023-11-13

**Reviewer chosen by:** Yu-Lu Chen

**Reviewer accepted review:** 2023-12-07 01:30

**Reviewer performed review:** 2023-12-07 08:19

**Review time:** 6 Hours

## SPECIFIC COMMENTS TO AUTHORS

The argument is quite interesting for its rareness I personally agree with the leading management, but I'd suggest a deeper meditation on the radiological contribution in order to achieve a presuntive diagnosis of pancreatic metastatic cancer, since the patient has been operated without any preventive diagnosis. The discussion about chemotherapy is less interesting since the well-known ineffectiveness of this treatment

## SPECIFIC COMMENTS TO AUTHORS

Clinical information is lacking : - There is no information if the lesion was an isolated recurrence, whether the patient had other sites of disease. - Please describe the surgical pathology finding, what was observed at surgery time, how the operation proceeded, what were the pathology margins. See for example Operative Report <https://training.seer.cancer.gov/abstracting/procedures/operative/example/ex4.html> - Describe how the patient recovered from the surgery. - Post-operatively : what imaging were done ? What were patient's symptoms ? Did the patient receive further therapy ? - What is the last date of consultation, status of the patient, number of days or weeks since surgery. The discussion and conclusion bear no relevance to the case report. The discussion and conclusion should evaluate how the patient's actual management match or not-match the literature. Conclusion should mention what was important in this case report, for example importance of the surgical resection of a metastatic recurrence.
