Dear Editors,

Thank you very much for your letter and the reviewers' comments. These comments make us find the inadequacies of our article. Please convey our sincere thanks to the reviewers.

Based on the reviewers' comments, we have made several modifications on the original manuscript. For easy check, these revised parts in this version of the manuscript have been highlighted in yellow. And, we have carefully replied the comments from the reviewers and have made a list of responses to the comments in point-by-point fashion, which can be found below.

Thank you again for your assistance.

If you have any questions regarding this manuscript, please feel free to contact me. We are looking forward to hearing from you soon.

Best regards,

Jide A and Xiangren A

Reviewer 1:

Thank you for your comments. Based on your comments, we have made the modifications on the original manuscript and have also made some explanation as below.

Comment: Your paper is well constructed but you some revision of English language. Also in my opinion the Introduction section is excesively long for a case report and needs to be shortened. This can be done mooving the table and description of your experience in the Discussion session. Some other literature experience will be wellcome in the Discussion in order to compare your experience with other reports. Another observation is that you have to remove the phrase "). Multiple hepatic segment resections combined with abdominal wall sinus resection under general anesthesia were performed on June 20, 2020" because you repeat it few lines bellow. Also you have to improve the quality of the pictures and to add more explanations to them; this will increase the quality of the manuscript and will offer a better image of the case.

Response: First of all, thank you very much for your valuable and pertinent comments on this manuscript. Secondly, I've shortened the introductory section and removed the repetitive language, revised the article to re-touch the language and re-uploaded the images.Finally, if you feel that there is still something wrong with the modification, I hope you can give me your advice. Thank you very much!
