SPECIFIC COMMENTS TO AUTHORS

Dear authors, Thank you for the opportunity to read your manuscript "Diagnosis and treatment of a mixed infection of hepatic cystic echinococcosis and alveolar echinococcosis with abdominal wall abscess and sinus tract formation: A case report". I was impressed by your experience treating such complex cases. Your paper is well constructed but you need some revision of English language. Also in my opinion the Introduction section is excessively long for a case report and needs to be shortened. This can be done by moving the table and description of your experience in the Discussion section. Some other literature experience will be welcome in the Discussion in order to compare your experience with other reports. Another observation is that you have to remove the phrase "Multiple hepatic segment resections combined with abdominal wall sinus resection under general anesthesia were performed on June 20, 2020" because you repeat it few lines below. Also you have to improve the quality of the pictures and to add more explanations to them; this will increase the quality of the manuscript and will offer a better image of the case.
