SPECIFIC COMMENTS TO AUTHORS

Thanks for this interesting case however i have some comments 1- past history of the patient was not clear whether she had previous attacks of jaundice , itching pain..... 2- after the discontinuation of medication the authors mentioned that she restored azathioprine 0.5 mg you mean 0.5 mg /kg? and steroid 7 mg do you think this dose is adequate for her weight ? please clarify and mention her weight 3- did the biopsy show any features of cirrhosis? 4- did the patient have upper GI endoscopy or colonoscopy to exclude PHT and IBD respectively? 5 - those patients are subjected to multiple relapses i think you should add in discussion the rescue therapy and your plan for long term follow up
