SPECIFIC COMMENTS TO AUTHORS

This is an interesting study of the safety and efficacy of it for sedation of patients undergoing bendable bronchoscopy. The authors performed a meta-analysis of randomized controlled trials of midazolam. The study is overall well performed, and the results are well discussed. The reviewer recommends to accept this study after a minor revision of the manuscript. Comments: 1. The manuscript requires a minor editing. Some minor language polishing should be corrected. 2. The aim is missing in the abstract, please revise. 3. References list should be edited. 4. Image should be improved.

Reply: Thank you for your positive comments and constructive suggestions.

1. Our Manuscript has been polished language by Editage.

2. We have added the research objective in the part of Abstract.

3. References have been updated, and the PMID and DOI numbers have been added according to the journal guideline.

4 We have improved the quality of images.
