

1. Several sections are comprised of excessively long paragraphs, Please reformat and amend these into smaller more digestible paragraphs

I have divided the long paragraphs into short sentences, which is shown in yellow colors.

2. A number of sentences are no referenced. For example the first two sentences in the INTRO and the sentence in the new biomarkers section that lists an array of cytokines altered in AIP

I have add the relevant references marked in yellow colors.

3. Person first concepts must be adhered to: AIP patients should be patients with AIP
I have revised the AIP patients as patients with AIP

4. In the last section there is a sentence that lists various items and then ends in etc. Please revise this to a more standard format

I have revised the sentence.

5. Please ensure that all references are provided following the precise requirements of the journal

all the references was checked according the requirement of the journal.
