Scientific significance of the conclusion in this manuscript	[Y] Grade A: Excellent [] Grade B: Good [] Grade C: Fair [] Grade D: No scientific significance
Language quality	[] Grade A: Priority publishing [Y] Grade B: Minor language polishing [] Grade C: A great deal of language polishing [] Grade D: Rejection
Conclusion	[Y] Accept (High priority) [] Accept (General priority) [] Minor revision [] Major revision [] Rejection
Re-review	[]Yes [Y]No
Peer-reviewer statements	Peer-Review: [] Anonymous [Y] Onymous Conflicts-of-Interest: [] Yes [Y] No

SPECIFIC COMMENTS TO AUTHORS

I find this short review excellent. It is informative and helpful to those working with MG patients. Information on specific immune targets for autoantibodies other than ACh receptors is often absent from texts targeting nonspecialists, and is here correctly addressed. Although I have no criticism as to its scientific contents, I suggest the text might become even better if a thorough correction of minor issues in English were carried out.
